

### Main Features

- Double diameter impression cylinder is used for improving printing quality.
- Micro adjusting of the lower plate cylinder in axial and radial directions can be performed without stopping the press.
- Our own patented sheet transfer mechanism of eccentric and swing four connection rods ZL96204910.7 is used for stable running.
- The action of cylinders throw-on and off, lifting of water rollers and ink rollers are performed by pneumatic system with easy adjustment and operation.
- There are powder sprayer, blanket cylinder dry unit and plate cylinder positioning unit for options.

### Main Specifications

Max. sheet size	650×940mm
Min. sheet size	393×546mm
Max. printing area	640×920mm
Max. speed	10000s/h
Thickness(weight) of paper	0.04~0.20mm
Feeder pile height	1200mm
Delivery pile height	1000mm
Power of main motor	11kw
Overall power	25kw
Overall dimensions	5354×3440×2645mm
Machine weight	14000kg
