

Description

It is suitable for sheeting and slitting the lamination material and paper reel from 80gsm to 600gsm in thickness. It adopts step motor or servo motor, Panasonic PLC control system, photocell tracking system, automatic hydraulic shaftless loading system, automatic working table lifting system and automatic paper arrangement. The machine combines mechanism system, electric system, hydraulic system and pneumatic system. It has merits of high speed and high precision etc.

Specifications

Model Project	DFJ-1400/1600D
Max. Unwinding Width	1600mm
Cutting length	20-1999mm
Precision	±0.2mm
Speed	130m/min
Weight	5800-7800KG
Overall Dimensions	9100×4100~4300×2000mm
