

## Description

It is suitable for slitting and sheeting lamination material and paper reel. It adopts step motor (or servo motor), photocell tracking system, automatic loading system, automatic working table lifting system and automatic paper arranging system etc. It combines mechanism system, electric system, hydraulic system and pneumatic system. It has merits of high precision and easy operation etc.

## Specifications

Model Project	DFJ800-1600
Max. Unwinding Width	800-1600mm
Cutting Length	20-1999mm
Length Accuracy	± 0.15mm
Speed	20-80m/min
