

Description

It is suitable for sheeting and slitting the lamination material and paper reel. It adopts step motor or servo motor, photocell tracking system, automatic pneumatic loading system, automatic working table lifting system and automatic paper arrangement. The machine combines mechanism system, electric system, hydraulic system and pneumatic system. It has advantage of great precision and easy operation etc.

Specifications

Model Project	DFJ600-1600B
Max. Unwinding Width	1600mm
Cutting Length	20-1999mm
Precision	±0.2mm
Speed	20-120m/min
Weight	2200-4800kg
Overall Dimensions	6650×1600~2900×1650
