Description

1. The machine can automatically deal with ill tangency, ill connection and so on.
2. Auto bender machine program supports various file formats
3. The machine can automatically control precision of the blade length. Just one bending could reach the designated position
4. Multi-task function
5. The replacement of bending tools takes only one minute (patented technology)
6. The machine provide with simulation bend function
7. High accuracy and high efficiency

Specifications

Model	ABM-300D	
Function	Bending	Multi bridging
	Cutting	Inner automatic lipping
PC system	windows2000/XP/2003/vista/win7	
Specification of rule	Thickness: 0.71-1.07mm Height: 23.6-40mm	
Min. head end length	2.0-2.5mm	
Min. tail end length	2mm	
File formats	DXF、DWG、NC、ABD、AI	
Language	Chinese English German Spanish	
Standard mould	Cutting mould 1 set Bridging mould 1 set	
Weight	N.W. 480kg G.W. 560kg	
Power	AC220 V 50~60Hz	
Air pressure	8kg (0.5 ~ 0.8Mpa)	
Measurement	1810×730×1400mm	
Packing size	2550×1000×1800mm
