

Description

This machine is integrated with optical, electrical, mechanism, etc. are mainly used for the verification and elimination of watch code.

With the functions of grade identification to barcode or two dimension code), counting and elimination of repeated, empty, discarded code, it is suit for many fields such as medical, consmetics, food packages, etc.

Automatic feeding head:

It can feed die-cutted and well glued sheet and double sheet control system is also equipped.

Verifying platform

Stable air suction sheet transportation system for barcode verification with high speed.

PLC touching screen control system

Specifications

Model	JCT-500
Max. sheet size	500×380mm
Min sheet size	80×90mm
Max. speed	0-120m/min
Power	1.79kw
weight range	>200g/m ²
Weight	0.5t
Overall Dimension	3000×1080×1250mm
