

- Product Name: UV-900SF/1200 SFSnowflake Curing Machine

Feature

UV-900SF/1200SF is designed for making the snowflake effect, especially used in the tobacco and wine packaging.

It can not only used with automatic screen printing machine, but also used with other equipments. Otherwise, it can used for drying in the industries of screen printing, dyeing and printing, electroplating, and electronic circuit board etc., cooling down and UV curing of other special effects. It features:

- 1.Independent control of four groups of UV lamps, two choices of UV intensity.
- 2.Two independent variable frequency conveying systems and high speed can run at 60m/minute.
- 3.Four groups of UV lamps have independent cooling system, equipped with two groups of adsorption.
- 4.The material of conveyor belt is imported Teflon.

Specification

Model	UV-900SF	UV-1200SF
Max. Conveying Width (mm)	900	1020
Conveying Speed (m/min)	0-60	0-60
UV Detonation Light Power (kw)	5	5.6
UV Lamp Power (kw)	8×3	9×3
Total Power (kw)	40.8	44.4

Dimension (LxWxH) (mm)	4600x1840x1460	4600x2000x1460
