SMART®

CRS商业收银管理系统

CRS，是一家专门为商业与餐饮企业而设计的专业的功能强大的管理系统，简单实用，基于Android操作系统，以现金登记结算业务为核心，提供订餐、收银机、销售管理、基础数据管理、原材料管理、报表分析等功能。具有界面友好，使用方便，功能齐全，运行稳定等主要特征，从根本上满足餐饮企业的日常运营和管理。

特征：
界面友好，操作简单快捷
双套数据备份，更安全可靠
灵活的会员管理及促销折扣
强大的数据分析报告

应用：
您可选择企业现金登记管理系统应用于超市、便利店、零售、服装、果蔬店、化妆品、医药等。

餐饮管理系统

Introduction:
CRS is a professional catering management system specifically designed for catering business with strong function, simple and practical use based on Android OS, core to cash register and settlement, provides food ordering, cash register, sales management, basic data management, raw materials management, report analysis and other functions. It owns friendly interface, easy to use, full-featured, stable operation and other major features, shall fundamentally to meet the daily operation and management of catering business.

Feature:
Friendly interface, simple and quick operation
Dual data backup, more secure and reliable
Flexible membership management & promotional discounts
Powerful data report analysis

商业收银系统

Introduction:
BRS is a professional business cash register system, has the main features such as friendly interface, simple and quick operation, dual data backup and powerful data report analysis etc. Same as catering management system, it is perfect for supermarket, convenience stores, clothing, retail, cosmetics and medical etc.

Main function:
Merchandising cash register function
Daily settlement function
Basic info management
Storage management
Sales info management
Sales Promotion management
Data report analysis

POS机主板

CJE2/CJE4 Customized Android POS Motherboard

CJE2/CJE4主板基于Android系统设计，具有功能强大，配置灵活，接口丰富，性能稳定等特点，已广泛应用于各个行业的智能设备中。目前已大量应用于Android收银机、排队机、广告机、彩票机、彩票机、工业平板电脑、自助取款机、楼宇对讲、自助缴费设备等。

		Built-in speaker + mic
		External equipment
		Bar code scanner, kitchen printers, electronic scale, etc.

Customized Solution
 • Hardware functions customization : customize different motherboard for different industries
 • Hardware motherboard customization : customized the motherboard according to the model shell
 • Application software customization : Provide kinds of customized softwares(Android, serivo)
 • Function module customization : provide thermal printer, NFC/RFID, MSR, IC card, customer display(LED/LCD), WCDMA/EVDO, etc.
 • OS customization :
 • Startup picture : customized company logo or specified picture
 Power on : customized according to customer's requirements, system go into application directly, users cannot operate the system.
 Application system immobilized : customized application system immobilized, users cannot install their own
 Standard interface : Provide further development documents/SDK, DMO program.

Successes & Applications

POS cash registers, Inquiry machine, advertising machine, automatic calling distributor, lottery machine, industrial tablets

(2D POS terminal) (POS cash register) (Lottery machine) (Queue machine)
