## Remote Multi-deck Open Chiller

1. Double air curtain technology
2. Remote and split cooling units
3. Autocontrol Accurate defrosting
4. With night curtain
5. Computer control & digital display
6. Can be spliced into 5m,7.5m,10m...

### Technical parameters:

Model	Voltage(V/Hz)	Power(W)	Temp.(°C)	Refrigerant	Dimension(mm)	Loading quantity
KX-2.0PC	110~240/50~60	360	2~10	R22	2020*1094*1650	14SETS/40HQ
KX-2.5PC	110~240/50~60	440	2~10	R22	2520*1094*1650	8SETS/40HQ

### Key Features:

1. Double air curtain technology to avoid refrigeration dead zone. Advanced back blow cooling system, cooling fast, uniform temperature, high-efficient and power-saving;
2. Executive component of refrigeration system and electrical controller are famous foreign brand to guarantee products run stably and safely. Enlarge evaporator design, increased efficiency of heat exchange to low temperature much faster and make the temperature much lower and more power-saving;
3. Accurate defrosting auto-control, stable performance; adopt natural air defrosting, reduce power consumption.
4. Ladder type shelf enhance the display effect of the inside goods.
5. Full transparent hollow glass side panel, luxurious and magnificent, excellent display effect;
6. Night air curtain design which can be used in night and non-business hours, more power-saving and reduce
7. Microcomputer digital temperature controller can control the temperature more precisely.
