### 3.product details

### 4.folding schematic

## 5.features

1. High quality steel hardened by cold-welded, high-strength, high load capacity.
2. Unified specification, fixed capacity, easy to stock inventory.
3. Adopt international standards, support the use of container, effectively improve space utilization.
4. It can be stacked four high with each other, to achieve three-dimensional storage.
5. Galvanized surface treatment, do not pollute the environment.
6. Folding structure, low cost recovery, is an alternative to wooden crates.
7. Can install wheel at the bottom, extremely convenient to move.

## 6.Packing and shipping

MOQ: 50pcs

Port: tianjin port or as your requirement

Payment: L/C, T/T or other type

Delivery Time: Within 25 working days after receiving the deposit

Packaging: First batch by plastic film, then by steel strapping. Also we can follow your suggestions

Shipping: By sea delivery or other transportation
