Manufacture Date		Warranty Period	One Year

I. Special Features:

1. Stand in no fear of cold in the warm winter and promote blood circulation.
2. More helpful to those who have cold, stiff hands and feet, feeble bodies and uneasily liable to sleep in winter.
3. Built in with a temperature controller, the unit automatically cuts off the power supply for the excessively high temperature and makes contact when the temperature drops.
4. This product uses an indefinitely variable micro-adjustable temperature controller to adjust the temperature suitable for you anytime.

II. Use Instructions:

1. Insert the plug of the control line into the socket before using.
2. Adjust the temperature appropriate for you according to the individual preference. The clockwise direction is for the high temperature.
3. If not using, turn the temperature switch to“0” and unplug the power cord from the outlet. The plug should be placed out of reach of children.

III. Installing Steps:

1. Dismantle the bedcover and eliminate all foreign matters.
2. Spread the heating mattress even completely. (Note: do not fold it into an angle.)
3. Lay the bedcover in the bed.

※.When this product is used in an adjustable type of bed, it is necessary to confirm the heating mattress and electric cord will not fall in the gap, as the heating mattress will be clamped with damage, causing dangers easily.
