Use Instructions for Milk Bottle Warmer

I. Product Features:

Easy to operate, portable, space-saving

II. Functions

The 60°C constant temperature device maintains milk around 60°C, convenient for babies to suck anytime.

III. Specifications:

1. Power Rating: 110V or DC 12V (These two different specifications must not be interchangeably used each other.)
2. Power Consumption: 10W
3. Dimensions: $\varphi 115 \times 115 \times \varphi 63$ mm (O.D. \times H. \times I.D.)
4. Material: The outer casing is the foodstuff grade of PC plastic and heat radiating surface is stainless steel, safe and hygienic.

IV. Operation Instructions:

1. Insert the plug into the 110V or DC 12V power source. (Our company has two different specifications. Please connect as per the specified specification of the product and do not connect the wrong power source.)
2. Place the milk bottle loaded with a right amount of boiling water or milk (hot or cold) on the warmer for keeping warm.
3. Start to heat up and, then, maintain it around 60 °C.

V. Safety Precautions:

1. After locating the milk bottle in the warmer, connect the power cord with it. After using, be sure to unplug from the outlet to avoid the idle running.
2. The mixed milk must be sucked up within one hour when warmed to prevent the degeneration.
3. In case the product is wetted carelessly, blow it dry by a hairdryer first and, then, use.
4. Wipe the warmer saucer with a wet cloth for cleaning. Do not place the whole milk bottle into water.
5. In the event of any damage, stop using and send it back to the dealer or our company for handling.

VI. Timetable for Heating up:

Heating Time	0 hour	1 hour	2 hours	3 hours	4 hours
Temperature	18°C	39°C	46°C	51°C	54°C

VII. Simple Troubles Shooting:

Failure Phenomenon	Examination and Solutions	Remarks
Not Heating	1. Check if the power source is plugged in.	When you confirm or cannot determine if they are causes of the failure, contact the dealer or our company for handling.
