

Holographic Rear Projection Film

Holographic Projection Film is a high contrast film primarily used for store window displays and high end video applications. This unique high resolution screen technology offers superior brightness, contrast and black levels even in high ambient light and daylight. It is made of high-quality polyester film, Durable more than 5 years.

The film is available in a range of standard screen sizes (30" - 120"), the whole roll size of the film is 1.52x30 meters. Custom shapes and sizes are also available to create unique promotional eye-catching screen, and pieces can be simply joined to create large format displays. It has a self adhesive layer (peel and stick) making it easy to apply to Glass or Plexiglas.

Benefits
