

Key Specifications/Special Features:

Functions:

1. This is a smart remote IR controller that can replace the remotes of ordinary home appliances such as Aircon, TV, Set Top Boxes and etc. with your smart phone.
2. The smart remote IR controller helps you to local/remote control IR appliance through the App from anywhere.
3. It can automatically match IR code through the cloud.
4. Supports IR code learning
5. Supports Wireless Connection and Wi-Fi/3G/4G control
6. One-button control multiple devices Supported.
7. The timing control supported.
8. Real time control, intelligent triggers.
9. Automatic device matching without learning
10. Automatic codes update from cloud.
11. Exquisite design, lightweight, portable, very convenient to use.

Features:

1. Supports 9000+ IR devices such as Aircon, TV, Set Top Box and etc.
2. Compatible with Android 4.0, iOS 7 and above smart phones.
3. Use infrared emission frequency of 38-56KHz.
4. 360 degrees IR control, Infrared transmittance of up to 95%.
5. Black light transmissive material, reduce the diffuse reflection, improve infrared penetration
6. The IR remote control distance is about 10m.
7. Has sensor indoor temperature and humidity.
8. 20 second fast connection with smart link net technology.
9. Can fix on the ceiling, paste on the wall and put on the desk.
- 10.

Specifications:

Product Name	WIFI Universal Smart Remote Controller
Model No.	RSH-IR01
Supported OS	iOS 7.0/Android 4.0 and above
Input Voltage	5V DC / 1A (Micro USB)
Infrared Frequency	38-56 khz
Infrared Direction	Multiple-direction
Temperature Range	0 - 50°C
Working Humidity	≤80%
Standby Power	≤0.85 W
Wi-Fi Frequency	2.4 GHz 802.11 b/g/n
Infrared longest distance	10M
Package contents	1 *remote controller/1*user manual/1* charge cable
