

Features:

This is a high-tech machine with advanced technology, by absorbing most up-to-date machine producing experience and utilizing world famous fittings, and with our strong CNC processing ability, and careful design This machine is multi-functional, with very high stability and high automation level,. Entire quality reaches world advance level. This coating machine is special equipment for glass fiber by solvent type coating, drying curing, cooling and rewind

Technical Data:

Laminating material	OPP、PVC、PET
coating width	850、1050、1250、1500mm
Mechanical speed	250m/min
Unwind web dia.	Φ 600mm
Rewind web dia.	Φ 600mm
