

## Description

Ten in one Album Making Machine has ten functions of creasing, binding, heat pressing, cold pressing, CNC cutting, round corner cutting, hard cover making, cover edge handling, cover edge cutting, cover grooving and hot binding. Delicate design, small occupation which can save many shipping cost. Simple operation, combined with electric and pneumatic design. The creative design of hard cover making can help to solve many problems of our customers in making cover. It combines several equipments into one machine. The CNC Cutter adopt the CNC blade and IR program which can cut very accurately. The aluminum alloy creasing blade can crease the delicated line and will not damage the surface of the pictures. With design of both cold and hot pressing, grooving heating. The width of creasing is adjustable.

## Specifications

Operation mode	Electricity and Pneumatic
Creasing width (mm)	530
Creasing Paper Thickness (g/m <sup>2</sup> )	100-500
Binding thickness (mm)	50
Pressing size (mm)	550x400
Pressing height (mm)	200
Heating Temperature range (°C)	50-60
Cutting width (mm)	460
Cutting thickness (mm)	40
Voltage (V)	220
Power (W)	1800
Hard cover making size (mm)	310x460
Cutting Precision (mm)	<0.1 (Infrared calibration)
Net weight (kg)	650
Gross Weight (kg)	690
Machine Size (mm)	1300×1070×1200
Package size (mm)	1440×1140×1390
