**Note:** this is Double lamp arm, installed in the middle of the road barrier

1, the product temperature -30 ° c/+ 80 °, working time is 10 hours PER day, 2-3 days or more backup time .

2, with high brightness LED of led light, has a low temperature, the attenuation of the small, long-life, high brightness. Equal brightness is twice as low pressure sodium lamps.

3, betterly lift 5 year ,solar panel lift more than 25 years , LED lamp lift more 70000hours

4, Double lamp arm work Is full power output before 6 hours, 6 hours behind half the output power.

Mean is 6 hours output 100% power ,then 6hours output is 50%, Because late at night, saving energy, can reduce the lighting intensity
