

Description

This machine adopts the latest design feeder automatic conveying surface tissue, automatic positioning, automatic hot melt glue coating and automatic cardboard conveying. It adopts automatic paper conveying machine with independent intellectual right. And then bottom paper automatic connected, automatic pasting, automatic receiving. The products processed smooth by this machine with high accuracy laminate, ruled out surface smearing and scratches problem. And solve the very large scale production bottleneck.

QTM 1300A can be used for efficiently producing various types of high-quality folder, table calendar, photo album, decorative painting, sample(wallpaper and cloth brochures)and high grade packaging box(cigarette box, wine box, phone box, tea box, moon cake box and other large gift box)laminating. Excellent quality , ranges sizes, high speed, suitable for ranges of products, stable and reliable operation, easy operation and maintenance, saving labor and energy.

Specification

Model	QTM-1300A
Length of paper	200-1300mm
Width of paper	120-600mm
Thickness of paper	80-200g/m ²
Thickness of cardboard	1-3mm
Speed	0-25pcs/min.
Power	22kw
Weight	3000kg
Dimension	L7000×W2100×H1260mm
