

Description

It is used to slit and rewind materials from 50gsm to 800gsm in thickness, such as various paper, polypropylene, polyethylene, lamination material, and monolayer aluminum foil so on. It adopts double Sunfar Frequency Inverter system (PLC) and it has features of photocell tracing system, (hydraulic rectification system is available), automatic loading system, precision and high speed etc.

Specifications

Model	QFJ1100-2800C
Project	
Main Moto Power	3-11KW
Torque Motor	3-15KW
Slitting Speed	16-260m/min
Max: Unwinding Diameter	1500mm
Max: Rewinding Diameter	1500mm
Weight	3500-12800KG
Overall Dimensions	3500x2200-3800x1900mm
