

JT600C Multi-function GPS tracker**Introduction :**

JT600C is a small-size multi-function GPS tracker combined with vehicle tracking and portable tracker characteristic features. It has the features of portable GPS tracker: small size, waterproof, large capacity backup battery, also has good external circuit processing and signal detection function like car tracker.

Suitable for motorcycle, fixed assets, fleet management and remote monitoring management.

Features :

1. 6-30V voltage input, vehicle and motorcycle location tracking management
2. Intelligent power management, standby time more than one month , supports real-time monitoring the battery power.
3. Power saving: minimum standby current 3mA.
4. Built-in 3D G sensor, suitable for assets location tracking
5. Waterproof class IP65
6. AGPS , base station auxiliary orientation

7. The historical data storage and intelligent data uploading function
8. Support multi-language SMS alarm
9. Build-in 1100mAh battery

Specification

Type	Description	
Basic function	Transmission Mode : GPRS/SMS/UAPT	
	Intelligent working mode	
	Support SMS to inquiry the current position	
	AGPS	
	Build-in 3D G sensor	
	Real-time monitoring the battery power	
	Geo-fence	
	Mileage statistics	
	Time difference set	
	Alias set	
	Emergency automatic criterion and application	
	The historical data storage (intelligent mode)	
	Alarm: low voltage alarm, SOS alarm, enter/exit geo-fence alarm, over speed alarm, harsh braking alarm	
	Remotely cut off the fuel pump	
2 input for signal detection / 2 output for control, flexible I/O definition		
Parameter	Dimension (L×W×H)	83×58×33mm
	Case Material	Engineering plastics
	Weight	80g (with standard accessories)
	Working Voltage	DC 6-30V
	Working Current	60-80mA
	Build-in Battery	1100mAh
	Waterproof Rate	IP65
	GPS Chip	Ublox
	GSM	850/900/1800/1900 Mhz
