

Description

- . Stand-up and separate part mechanical structure.
- . Magnetic powder brake made in Ningxia China 5kg.
- . Slitting knife 10.
- . Mechanical shaft as unwind shift.
- . Two air expanding shafts, magnetic powder clutch. Made in Ningxia 5kg.
- . Air expanding control for main roller nip roller.
- . Synchronous belt for power transmission.
- . Guiding rollers are made by professional manufacturer.
- . Japan Panasonic inverter.
- . Self-cooling motor made in China.
- . Manual unwind tension adjustment.
- . EPC sensor is controlled by single chip and synchronous motor
- . Mported switches and plugs

Specifications

Slitting material	BOPP、PET、CPE、PVC, etc
Unwind diameter	φ650mm, rewind diameterφ420mm
Slitting film width	8-1300mm
Mechanical speed Max	200m/m, normal 150m/m
Total power	5KW power voltage: ±10%
Main motor	4Kwinverter motor
Machine weight	2 ton
