

Description

This machine is used for paper coating by water-based varnish, IR hot-wind drying.

This machine can be used together with YG calendaring machine also manufactured by us, first being coated in SG, then through YG, the paper will be much glossier. In addition, water-based varnish is environmental protection.

This machine can also be used for ground coating before UV coating, so UV varnish can be saved.

Air knife system for light paper, automatic machine stop mechanism for paper jam, powder-removing section is optional for this machine.

According to requirements, 2m or 4m lengthened conveyor is optional.

Specifications

Model	SGS-IR920P	SGS-IR1200P
Max. width	920mm	1200mm
Max. speed	3500sph	3500sph
No. x IR lamp	18x1.5kw	18x1.8kw
Paper weight	250-800g/m 房	250-800g/m 房
Weight	2.1t	2.5t
Overall dimensions	6885x1500x1300mm	6885x1700x1300mm
Total electric consumption	28kw	33kw
