

Feature:

1. Three directions adjustment blades can make the best blade Angle position.
2. Shaft-less mode quickly change, positioning accuracy.
3. Up and down floating rollers adopt ball screw transmission, super-low interstice, operate flexible.
4. Impression roller linked with guide roller can make the change of tension become smaller, and benefits to print the film which have the large ductility or no ductility.
5. Equip with quick-lift device, lock the impression roller when stop machine.
6. Horizontal register uses the hand-wheel to adjust, require to have the lock mechanism, ruling, operate flexible.
7. Each unit installs static brush, effectively eliminates static electricity.
8. Ink-transfer roller atomic accelerates in proportion to the rotate speed of the main machine, and has the positive and negative rotate function.

Technical Data:

Print material	BOPP、PET、PVC、PE、NY、Paper
Print width	850、1050mm
Mechanical speed	200m/min
Plate cylinder	Φ 120mm~300mm
Unwind, rewind web dia.	Φ 600mm
