

- Product Name: SH-720/780/1020 Single-lane Industrial Wicket Dryer

Characteristic

SH-720/780/1020 Single-lane Industrial Wicket Dryer designed with drying technology, is widely used for the drying area in the printing industries of ceramic decal, glass decal, packing printing, and credit printing etc. It can be equipped with the closed dust system. It can not only run stand-alone to dry the printing sheets, but also be in line with printing machines. It Features:

- 1.It is equipped with three hot air sections, and fan cooling system. It can be equipped with different drying sections according to job requests.
- 2.Page-down vertical movement, wicket feeding with paper, electric heating jet and natural drying.
- 3.When working in line, it is driven synchronization with the main printing machine. When the main machine stops, it can be driven slowly by itself.
- 4.As an option, when it is driven by gap-type transmission, via the photoelectric control paper wicket gap, driving the conveyor belt and adjusting the speed of paper feeding.

Specification

Model	SH-720	SH-780	SH-1020
Max. Conveying Width (mm)	750x520	780x540	1020x740
Stand-alone Speed (p/h)	2000	2000	2000
In-line Speed (p/h)	synchronization with main machine	synchronization with main machine	synchronization with main machine
Number Of Clamps (pcs)	1348	1348	1078

Max. Heating Temperature (°C)	50	50	50
Electric Heating Power (kw)	19.2	19.2	28.8
Total Power (kw)	22	22	31
Machine Weight (kg)	6000	6000	6000
Dimension (LxWxH) (mm)	18500x1700x2200	18500x1800x2200	18500x2000x2400
