LQ1250S Paper Bowl Making Machine

Performance:

Our LQ1250S middle speed paper bowl making machine is designed based on our traditional single-turnplate type paper cup forming machine. LQ1250S series newly-designed paper bowl forming machine optimizes its transmission system and enables each independent functional-system to operate smoothly. Thus we can greatly reduce machine-wear caused by machine's inertial movement. By adopting photoelectric failure-detection system, our paper cup machine's reliable performance is guaranteed, thus offering a high speed and stable operation. This middle speed paper cup forming machine will auto-stop working when there is a failure. Thus it can greatly improve operation safety standard and help reduce labor force. It simplifies paper cup forming process. This machine can finish paper feeding, gluing, cup-bottom feeding, heating, knurling, cup-mouth curling, cup-collecting efficiently. It is especially suitable for making paper bowls with a height of 50-110mm.

Specification:

Model	LQ1250S	
Weight	3500kg	
Packing specifications	4000X1620X2100	
Total power	three-phase 380V, 16KW	
Air supply	0.5-0.8MPa, 0.4cube/min	
Capacity	50-70pcs/min	
Paper specification	single PE/double PE	
Paper grams	230-400g/m ²	
Paper cups specifications	(A) φ90-150mm	(B)50-135mm
	(C) φ60-115mm	(D)5-12mm
