

Description:

TBT50/4G Ellipse Perfect Binder is chain driven by 4 book clamps, which avoids the too much driving momentum in traditional disk perfect binder and the problems intermittent happened between the axes easily.

A great number of advanced technologies are available by this machine, such as PID temperature control, Frequency control of motor speed, photoelectrical identification, automatic check control and so on. Using imported electric components and pneumatic components which make the machine more stable, operated easier and adjusted more convenient. The attached paper attracted wool make the machine perfect.

The machine can process both stitched and unstitched signature, which is an ideal binding machine for various packaging requirement.

specifications:

Binding size	Max: 450×300mm Min: 150×105mm
Binding thickness	2-50mm
Binding speed	Max: 2000books/hours
Power required	12kw
Weight	2100kg
Dimensions	3350×1330×1259mm
