**3. Description**

- YHZB-1000 Automatic Sheet Cardboard Laminating Machine collects mechanism, electricity, pneumatics, hydraulic pressure, pneumatic power all the main technologies together, which is the leading style in the domestic market.
- One strong force air draft perforation belt paper guide is set to face paper and body paper of the machine respectively, is driven by programmed servo electric motor, so tempo is steady, paper feed smoothly and accurately. Couple high strength grip paper compound roller to locate, paste, first press the face and the body paper, then the two papers will be pressed four times by strong pressing in roller to delivery stacker, at last the products will be piled in three sided even way, and height of piled paper can reach 1700mm.
- This machine adopts Siemens PLC programmable controller, lots of photoelectric switch to monitor, hydraulic pressure system and pneumatic power system.
- The finished product is not only precise in laminating, but also very firm and even.
- The finished product will directly enter into next process such as die cutting without glue drying.
