

CONPO Solar Charge Controller

Application:

SDC series Solar Controller is a two battery solar controller with optional remote meter for RV's, Caravans and Boats.

Features:

1. Two battery charging:

Solar charge current is shared between two batteries based on a user selectable priority. When one battery is fully charged, all of the charge current flows to the other battery.

2. Highly reliable:

Epoxy encapsulation protects the controller against dust and high humidity. Extensive electronic protections, including short circuit, over current and reverse polarity, ensure that the controller will not be damaged by wiring mistake or overloads.

Technical parameters

Model	Rate Current	Rate Load Current	System Voltage	Ambient Temp.	Terminal Size	Weight	Dimensions
SDC10	10A	10A	12V/24V	-30C~60C	6mm2	0.2kg (main)	13.6*10.4*4.3cm/11.3*11.3*4cm (main)
SDC20	20A	20A	Auto.			0.15kg (MT)	(5.3*4.0*1.7inch/4.4*4.4*1.6inch (MT))
