

外观：金属磨砂质感 Frosted metal texture

中控增强版，采用更先进工艺水平制造。工业级的电路和结构设计，全部采用进口元器件。支持多中控桥接协议。

Enhanced center control , Using more advanced technology. Industrial-grade circuit and structural design , all imported components. Support multi- center control bridge protocol.

Power supply : AC 220V / DC 5V1A adapter.

Central control host antenna can strengthen the signal range, connect the farther intelligent product network, so that you can control home appliances when you go out .

Whether you are on business trip or traveling, all in control !

Binding cloud server, it has data security, automatic fault recovery , anti-network attacks and other functions. Low consumption, safe and stable operation, no noise.

Linkage binding switches, enjoy free control, to create a variety of intelligent space.

实现多种增值服务 To achieve a variety of value-added services

This control host has system information, information input, information output, centralized control, remote control, linkage control and other functions. It can provide home security, video intercom, home appliances control, home information services and other value-added services.

Size 200*113*30mm

Power supply DC5V1A adapter

Standby power consumption 1.2W/hour

Communication ZigBee TCP/IP

Wireless communication transmit max power 20.5dB

Wireless communication frequency 2.4G

Receive sensitivity -92dBm

Size 200*113*30mm	Power supply DC5V1A adapter
Standby power consumption 1.2W/hour	CommunicationZigBee TCP/IP

Transmit power	20.5dB	Wireless communication frequency 2.4G
Receive sensitivity	-92dBm
