

螺旋圆风管机 Spiral duct Machine

螺旋圆风管机可以制作大壁厚为2.0毫米的风管，风管的强度和密闭性良好，各种直径圆管转换迅速。又具有同步切断装置，加工速度快，性能稳定，所有均按欧洲标准生产，其性能已达到欧盟标准。

The spiral duct machine can manufacture air ducts of 2.0mm thick, with good strength and sealing performance. It can agilely switch betwducts of different diameters. It also has a synchronous cutting device, with a high processing speed and stable performance. All the products areprocessed according to the related European specifications, and their performances reach the related EU standards.
