

ABOUT US

Dongguan Feito Hardware Co., Ltd. is engaged in the design and development of sheet metal fabrication and production of CNC precision metal parts. Our production range includes cutting, punching, bending, stamping, welding, lathing, milling, powder metallurgy processing and assembly of Semi-finished products. Our products are mainly customized and we produce according to customer's incoming drawing, which includes precision metal parts, jig, fixtures and cabinet metal forming products. Our products are widely used in optical communications, sensors, SMT, electronics, household appliances, medical devices, automobile and other industries.

Material	Available Material for Plastic
Aluminum, Zinc	ABS, PC, ABS, PMMA (acrylic), Delrin, POM
Brass, bronze, beryllium, copper	PA (nylon), PP, PE, T
Carbon steel, stainless steel, SPCC	Fiberglass reinforced plastics, Teflon
Processing	Finishing
CNC machining (Milling/Turning), Grinding	High polish, brush, sand blast, anodization
Sheet metal stamping, bending, welding, assembly	plating (nickel, chrome), powder coat,
Punching, Deep drawing, Spinning	Lacquer painting, , silk screen, pad printing
Equipment	Application
Cutting Machine	CMM (3D coordinate measuring machine), 2.5D projector
Stamping Machine, Printing	Thread gauge, hardness, caliber. A closed-loop QC system
Punching, Spinning and Hydraulic tensile machines	Third party inspection available if required
Lead time & Pack	Application
7~15 days for sample, 15~25 days for production	Automotive industry / Aerospace/Telecom equipment
3~5 days via express: DHL, FedEx, UPS, TNT, etc.	Medical / Marine / Construction / Lighting system
Standard export carton with pallet.	Industrial Equipment & Components, etc.

OUR CERTIFICATES

WHY CHOOSE US

First time respond

Quote within 24hours, sales are engineering background, react fast and give strong support.

one/stop service

Offer form design, machining/fabrication, welding, surface treatment to finally assembly.

Design Service

2~5 days isable to get your ideas come to 3D design, 3-7 days able to get prototype done.

Competitive Cost

We are SME, low operating coat and innovative ideas enable to offer very competitive cost.

Production Capacity

500,000pcs monthly of sufficident production capacity enable to meet large demand.

Quality Guarantee

Experienced engineers, precision machines,CMM and closed-loop QC system to ensure qualtiy.

Delivery On Time

Sufficient production capacity and strong project management to ensure on-time delivery.

Good Service

Good service runs throughout the whole process from deisgn, production, sales to after
