1.2 Functions

Model: MJ-VI06

Basic Functions

- App Remote Control: Support iOS (8.0 and above) and Android (4.1 and above) phone or tablet. Add, delete your smart plug, and turn ON/OFF, schedule it. Multiple languages are supported.
- Compatible with Alexa, Google Home: This smart plug works with Alexa and Google Home. After defining a name, such as “bedroom light”, you can voice control it by saying “Alexa, turn on the light”
- WiFi Connection (2.4G ONLY): it connects to a WiFi router directly, no hub is required. Please note only 2.4G is support. Don't use it under 5G.
- Easy Installation: No professional installation is required. A detailed user manual is provided for easy installation.

Advanced Functions

- IFTTT Control: Works with IFTTT to control your home devices according to your conditions
- Repeat Schedule: Repeat schedule is available. You can create a schedule to turn on your cooker for breakfast 20 mins before awake every morning.
- Group Control: Create a group to control different home devices at the same time.
- Mode Control: Create different modes in the App, and control it according to different modes.
- Share devices: You can share the devices to your family, and then different people can control it without setting up again.

Key Point

- Hight-Tech Control(Remote & Voice)
- FREE App for iOS and Andriod
- Multi-Languages Support
- Easy Setting Up Procedure
- 2.4G Wi-Fi Connection
