

Hotel Key Card

nexqo
*a trustable
 hotel card supplier
 for over*
500 Hotels

Nexqo serves over 500 hotels around the world based on two facts, that to make the best product and to maintain the best service. Nexqo annually produces over 100 million cards and distributes them into more than 50 countries worldwide.

We serve world-class brands such as Hilton, Marriott, and CROWNE PLAZA, INTERCONTINENTAL etc.

nexqo
Compatible
with major hotel
Locking Systems

Hotel locking normally uses RFID system or magnetic stripe system. For RFID locking system, high frequency (13.56MHz) under protocol ISO 14443A is the most popular choice for majority of hotels.

Nexqo' cards work with major locking systems, such as SafLok, Kaba, Onity, Salto, ILCO as well as MIWA etc.

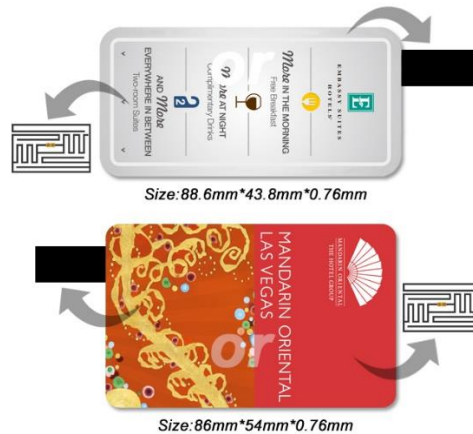

Frequently used RFID chips for hotel locking system:

- 1_ NXP Mifare 1k (Memory size: 1024 bytes; User memory: 716 bytes)
- 2_ NXP Ultralight (Memory size: 64 bytes; User memory: 48 bytes)
- 3_ Fudan FM11RF08 (Memory size: 1024 bytes; User memory: 716 bytes)

Frequently used magnetic stripes for hotel locking system:

- 1_ Low-coercivity (loco) at 300 Oe or 600 Oe
- 2_ High-coercivity (hico) at 2750 Oe

nexqo CR80/50 or customized card Dimensions

We are providing magnetic stripe cards with different shapes and coercivities (300 Oe, 600 Oe, 2750Oe, 4000 Oe) to our customers. Standard credit card size of CR80 with 300 Oe and size CR50 with 600 Oe are the most common hotel key cards in Nexqo's experience.

CR80: 3-3/8" x 2-1/8" (thickness: 30mil)

CR50: 3-1/2" x 1-23/32" (thickness: 30mil)

nexqo Quality is always the Priority

QC:

Every single card will be carefully checked by machine or manual work before dispatched.

Specialty:

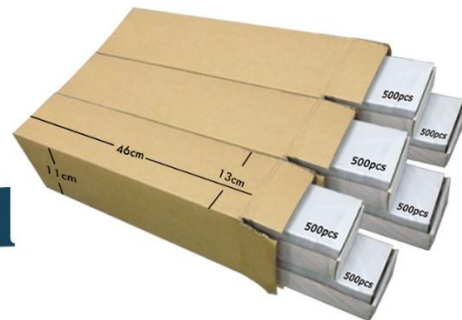

Nexqo is member of ICMA (International Card Manufacturer Association) and delivers outstanding quality that has been certified in accordance with CE FCC and RoHS certificates.

nexqo
provides tips for
Green Living

To make hotel key cards look great and always leave a wonderful impression to customers, most hotels change their key cards frequently, which would increase white pollution damage to the environment. Nexqo researches and develops green pvc material named NexPVC®. NexPVC® is a 100% oxo biodegradable pvc, it could biodegrade in a landfill condition without creating methane gas even in an oxygen-free environment. NexPVC® has passed the test (ASTM D3826 & ASTM D 5208-1) of The American Society of Testing and Materials and got the certificate from GEMA.

Packaging
keeps the
