

0.5M LED Ball

Blooming color of the world's beauty Presenting the finishing touch of the product

As a pioneer of Globe LED , Shenzhen Weigu Electronic Technology co., ltd. presents the minimum Pixel pitch (PH1.95), the minimum diameter (0.5m), no seam, no axis. Pre - maintenance and non - magnetic product.

Advantages

1. At present, there is no ball lower than P2 in the market. Our ball Pixel pitch is P1.95;
2. In the market, all the balls with spacing less than P4 are magnetized fixed modules. In the process of use, there will be the phenomenon that the magnets are not magnetic enough and the modules cannot be fixed.
3. At present, the ball with a diameter of 0.5 meters on the market is constructed of aluminum plate, which will result in a large and inevitable gap in the assembly of the ball. However, our ball is a plastic mold opening structure, which can well ensure the gap;
4. The 0.5m balls in the market are divided into two types, the upper and the lower. but for our ball just one PCB . In this way, there will be obvious equator line when assembled
