NSQ16 smart bracelet for Loves

Product Parameters

Features for Loves	EverDate Memory--Engrave special days in your heart and check anniversaries anytime; A beautiful way to display and celebrate your special moments together—every anniversary remembered forever. LovePulse Alert--constantly transmitting each other's heart rate data to your device; A subtle but meaningful vibration notification — the pulse of love bridging the distance between you. Shared Steps Harmony: every step is companionship, sharing each other's step count data; Track daily steps together, sharing your movement journey as one synchronized rhythm. Moonlit Sleep Insight: Even in dreams, you are connected, sharing his/her sleep quality every morning; Monitor and share restful sleep data, dreaming in harmony even when apart. OxyLove Gauge:Blood oxygen sharing — a breath of care from one heart to the other. Every breath is filled with care and concern, the fluctuations in blood oxygen are a mark of mutual longing;
AI Analysis	AI automatically collects user data, such as exercise data, sleep data, heart rate, blood oxygen, and other health data, and performs comprehensive analysis of this data. When the user accesses the app, it provides them with the latest health data analysis reports and recommendations. (via ChatGPT)
Family Links	Create your own family health space, allowing family members to stay informed about each other's health data anytime, anywhere.
