Shared features

- Dual power supply
- Responsive, stable & precisely controlled
- Multi-stage spray volume adjustment, dosage controllable
- Intelligent power saving and sleep mode design extend battery life
- Low battery reminders
- Desktop and wall-mounted (for HE-401 only)

If you are an experienced buyer, you should be already aware that there are many problem sanitizer dispensers on the market. Our models are the latest and with most reasonable/considerate designs. The design issues of other peers have been avoided, and some practical functions such as "sleep mode to save power, one touch to wake up" that increase the value of the products are added. Consider: if a customer purchased a dispenser that would consume a set of batteries within one or two months, or upon returning from a vacation found the dispenser is out of power, would they regret buying it? The sleep mode function can save power consumption when leaving home for a long time or when no one uses the device on weekends and holidays in the office.

Ultmost has been manufacturing consumer electronic products since 1987. Choose from our wide selection of sanitizer dispensers, projectors, interactive whiteboards, home entertainment equipment, and electronics gadgets. We design and produce consumer electronic products ourselves and carry out plastic and metal molding, plastic injection, pressing/punching, wire bonding, SMT, optical (glass cutting,

grinding, polishing and coating for PBS), printing, spray painting and assembly in-house to control quality and cost. Inquire today to begin sourcing our state-of-the-art products.
