

Jianli frame balustrade Key Features:

- Certifications: ISO 9001, ISO 14001, ISO 45001, and CQC.
- Aluminum Profiles: 6063-T5/T6 aluminum alloy extrusion profiles.
- Maximize the View: Unobstructed vistas with clear, strong glass.
- Elegant & Stylish: Modern design that adds value to any property.
- Durable & Long-Lasting: Built to withstand the elements with minimal maintenance.
- Weather Resistant: Perfect for any climate, ensuring longevity and safety.
- Frameless Track System for Balcony Balustrades :Featuring a sleek, glass-only design with no posts, this system is favored by architects and clients in areas of natural beauty.
- Handrail Surface Finish: Powder coating, electrophoresis, PVDF coating, anodized, and wood grain colors. Standard colors include matte black, white, ultra silver, clear anodized, and natural clean aluminum. Customized colors are available based on customer requirements.
- Market Reach: USA, Africa, South America, Europe, Middle East, Australia, Canada, New Zealand, South Asia, and domestic markets.
- Warranty: Up to 10 years.
- Experience: Over 22 years of production experience.
- Applications: Suitable for personal housing, villas, residential series, and commercial series.
- Sample Lead Time: 1-3 weeks.
- Delivery Lead Time: 40 to 60 days after sample approval and receipt of bank transfer.
- Customization: Open to discussing any workable ideas or customer requirements.

Additional Specifications:

Construction: Toughened safety glass panels are slotted into lightweight aluminum channels or 'glass tracks,' secured with rubber strips.

- Mounting Options: Typically fixed to the floor, but alternative methods are available depending on site conditions.
- Safety Features: Polished edges and radiused or dubbed corners for extra safety.
- Optional Handrail: Available in high-quality 316 stainless steel or timber.
- Compliance All our systems conform to local standards and are available. For safety and suitability, a solid structure (concrete, steel, or substantial timbers) is required for fixing the balustrade. Our technical team is available to advise on site requirements.

Sustainability: High recycled content in aluminum framing.

Availability: Offered through Advantage by Jianli
