

透镜生产线 Optical Lens Production Line

我司生产和出口多种不同形状、规格、尺寸及材料的光学透镜。

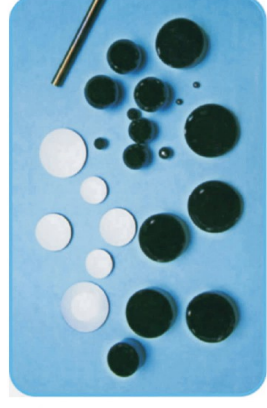

主要包括大中小透镜、球面透镜、非球面透镜和异形透镜等。

Kingopt manufactures various shapes and materials optical lens.

Wide selection of optical lens includes spherical lens, aspheric lens, cylindrical lens and strange shape lens, etc.

Main Processing equipments are imported from Germany, Korea and Japan.

Output over 30 million pieces per year.

透镜加工范围 Lens Technical Parameters

材质/ Materials	All kinds of high quality optical glass, quartz and crystal
外径范围/ Diameter	Φ 3- Φ 350mm
曲率范围/ Radius	R 1.5mm-∞
中厚公差/ Center thickness tolerance	±0.01mm
外径公差/ Diameter tolerance	±0.005mm
表面质量/ Surface quality	20/10--80/50
表面精度/ Surface accuracy	<1λ
局部误差/ Irregularity	λ/10
中心偏差/ Decenter	15"
镀膜/ Coating	BBAR coating, dichroic coating, super broad band antireflective coating, others coatings according to customer's request.
