

## **FINGER SPLINT**

Material:Aluminum and foam

Color:black,white,beige,blue

Size:S/M/L

Feature:Helps stabilize the joints of phalange in position.stabilizes fractures of the distal phalanx;Malleable aluminum splint can be reshaped to hold fingers at an exact degree of flexion or extension;provides firm support while injuire heals;No tap required.

### **Features**

- 1 immobilize the injured or fracture finger
- 2 Provide firm stabilization and treatment.
- 3 Adopt malleable aluminum with foam cushion.
- 4 Protect the tip of finger especially.

### **Application**

The splint is easy to apply and can be worn left or right.

Particular advantage: contrary to conventional, rigid night splints, the splint can be worn during the day allowing for weight-bearing (while walking).
