

Leather buckle three-button wireless remote control AK-QY03 introduction

Product parameters:

Product name: Leather buckle three-button wireless remote control

Model: AK-QY03

Size: 62.67*33.8*14.75mm, Leather buckle length 98mm

Working frequency: 433MHz (default) / 315MHz (optional)

Remote control distance: 50m (in empty environment)

Working voltage: 6V (2 CR2016 button battery)

Chip: Learning code EV1527

Button character : Switch lock pattern / ON-OFF character (optional)

Outer case color: Black

Weight: 22 克

Application filed: Remote control for gates, lamps, motors, etc., remote control switch

Product details:

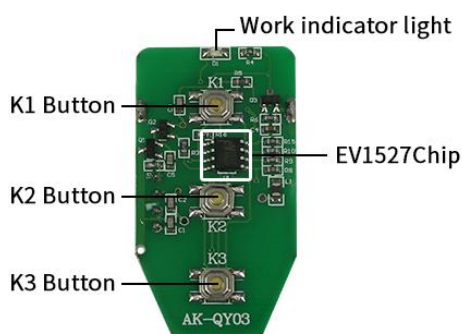

The arc-edge design on both sides makes the hand feel excellent; the volume is small and easy to carry; the outer casing adopts the snap-on fixed design, which is not only fastened but also convenient to disassemble. It can be used together with the receiving series with learning function, and the receiving frequency is used. The decoding method should match the reception.

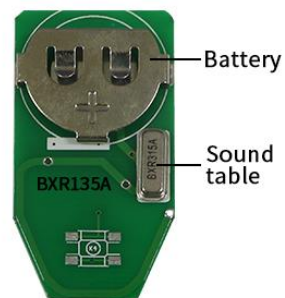

(Outer case)

(Silicone pad button)

(Circuit board facade)

(Circuit board rea)

Product application scenario:

Gate remote control

Lamp remote control

Motor remote control

Remote control switch
