

## LOW TEMPERATURE JUMP STARTER EJS-001A/B

|                       |                                     |                       |                                                                                                                                       |
|-----------------------|-------------------------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Battery Type          | Ternary Lithium Battery             | Start Current         | 500A/600A                                                                                                                             |
| Battery Capacity      | 16000mAh(62.9Wh) / 24000mAh(88.8Wh) | Peak Current          | 1200A/1500A                                                                                                                           |
| Cycle Life            | >1000 cycles                        | Car Electronic Charge | 1. Suitable for 12V gasoline cars<br>2. Suitable for 12V /4.0L diesel cars<br>3. Continuously use up to 40 times                      |
| Input                 | USB-C (5V/2.4A; 15V/10A)            | 3C Digital Charge     | 1. Suitable for most digital products, iPhone14 can be charged 7 times<br>2. Three lighting modes, continuously use up to 30-31 hours |
| Output                | 5V/2.4A; 12V jump start             | Charging Time         | 4-6.5 hours                                                                                                                           |
| Operating Temperature | -20~60°C                            | Certifications        | FC, CE, ROHS, CQC                                                                                                                     |
| Dimension             | 253*178*75mm                        | Weight                | 1180g/1325g                                                                                                                           |
