USB-C to Gigabit Ethernet Mini Converter 1000Mbps Allowing PC to Use Wired Internet

The USB-C (male) to Gigabit Ethernet (female) RJ45 adapter is designed for connecting a USB-C enabled computer (Windows/Mac/Chromebook) to Gigabit LAN port for stable and high-speed internet connection. The adapter supports up to 1Gbps wired internet speed. The device has special compact form factor and minimal footprint, making it perfect for on-the-go or at a desk use, without blocking other interfaces. The device is compatible with all USB-C data ports, and might require RJ45 driver installation on certain laptops.
