

Parameter Name	Parameter details
Product name	Galvanized Wire
Material	Low carbon steel
Type of galvanizing	Hot-dip galvanizing, Electro-galvanizing
Wire diameter	0.15mm-6.0mm (common specifications, can be customized)
Tensile strength	300-1200MPa (depending on material and process)
Elongation	≥10% (some specifications, depending on the product)
Zinc layer weight	Hot dip galvanizing: 30-600g /m <sup>2</sup> ; Galvanizing: 5-30g /m <sup>2</sup> (common range)
Volume weight	5-500kg (customized according to customer requirements)
Roll diameter	300-1200mm (common range)
Packaging form	internal plastic external woven bag packaging, drum packaging, etc. (according to customer demand)
Moq	100kg (negotiable)
Main export markets	Asia, Europe, America, Oceania, Africa
Customs Code	72172000 (Using the US Customs Code as an example, it may vary from country to country)
Applicable standards	ASTM A641, EN 10244-2 and other international standards
