

Features:

- [Power statistics function] View the energy report to correctly track the energy use around your home. Know which equipment consumes the most energy and make plans to save energy and electricity.
- [Wifi+Bluetooth dual mode] Connect to the network faster. Connection speed is twice faster than wifi only
- [Mini body] Our size is smaller, more convenient and easy to install. We can put it directly in the bottom box of the switch. So you don't have to climb the stairs to install the controller
- [Two connection methods] The controller is only connected to N line and L line, not to the switch. This smart DIY switch can be used with your old 2 Gang control switch. In particular, you can still manually control the old switch after installation.
- [Voice control] Fully compatible with Amazon Alexa and Google Home/Tmall Genie.
- [Timing function] Set the time to turn on the light, set the time to cook
- [Group function] can turn off or turn on group equipment together, which is more convenient --
- [Flame retardant material] is safer to use
- [3 restart states] Default on or off, or memory state. Don't worry about the light state when going out
- [16A current] Suitable for most equipment at home

Controller parameters:

Input voltage: 100-240V 50/60Hz

Maximum load current: 16A

WiFi standard: 2.4GHz 802.11 b/g/n

Application name: graffiti intelligence

Size: 42 * 42 * 20mm

[Single item packaging parameters]

Net weight: 0.031kg

Gross weight: 0.034kg

Quantity: 1 PCS

Package size: 42 * 43 * 22mm

[Carton packaging parameters]

Net weight: 3.5KG

Gross weight: 4.5KG

Quantity: 320 pieces/box

Carton size: 470 * 215 * 200mm
