REALISTIC COLORS

强悍高色域屏幕 色彩更真实

### High color gamut four features 高色域四大特点

1 Kaiku "high color gamut" adopts NTSC standard, color gamut value ≥85%, so that the color display is fuller, bringing excellent color experience;

2 Kaiku "high color gamut" light source module has been verified by new materials, customized high transmit-rate brightening material upgrade, brightness ≥300nit, brightness distribution uniformity up to 92%, convenient for users to use in outdoor mode. Can meet the better application experience of multiple scenes;

3 Kaiku "high color gamut" light source module through the physical optimization of LED lights, reduce the amount of blue light effectively reduce the damage to the pupil;

4 The newly upgraded Kaiku "high color gamut" heat transfer module, the introduction of graphene back paste heat dissipation, comprehensive heat reduction by 15%, improve the stable use experience;
