“Eco-friendly tableware mothers trust and choose”

Plant eco_friendly resin PLA sources CO2 during manufacture and harmless to human body. It is the eco-friendly tableware that returns to the nature during disposal so it is safe to infants and children who put the objects they contact for the first time into their mouth instinctively.

BPA FREE

You don't need to worry about green mom_i products, because it is made with corns and there's any harmful materials like endocrine disruptor, cancer-causing agent, and heavy metal.

NONTOXIC INK

You don't have to worry about if your baby suck or lick green mom_i product, because the design that printed with nontoxic ink. We didn't put the design on the parts, where baby could touch it with mouth or the food could reach for making a safer meal time.

Microwave/ Dishwasher/Boiling hot water

Green mom_i, which has an excellent thermal resistance that could stand in the high temperature is created with a long period of research at the mom_i research laboratory. Green mom_i is easy to use because it is available to be used in the microwave, dishwasher, and you can also boil it.

Perfect biodegradation

Unusable green mom_i products completely return to dust after buried in the soil, because microbes biodegrade them. However, the speed of biodegradation could have differences in the microbial environment in the soil and the type of the dishes.

Less CO²

Green mom_i doesn't create CO² in the middle of the process of manufacturing the materials because the raw materials come from the nature, and it also doesn't harm the global environment because we don't use the petroleum chemicals, the exhausted resource.

Sturdy Products

It is hard to break green mom_i product, because its quality isn't falling behind other plastic products, which made with the petro-chemistry, even though it was made with corns.

Product

- Our love for the nature and kids is well expressed through our product.
- Our product lines are eco-friendly minimizing the emission of co2 during the manufacturing processes and resulting in no environmental hormone.
- Our several years' worth of expertise makes it possible for us to express beautiful colors loved by little kids without using any policy.

1. Lunch box

Size 250*175*45mm
Weight 300g

2. Lunchplate

Size 305*212*26mm
Weight 225g

3. Babyplate

Size 280*200*35mm
Weight 244g

4. Section 3 plate

Size 250*215*20mm
Weight 148g

5. Mini Ssnack plate

Size 259*147*27mm
Weight 154g

6. Rice bowl

Size 98*52mm
Weight 73g / 235ml

7. Soup bowl

Size 117*40mm
Weight 81g / 240ml

8. Baby Mug

Size 169*63*70mm
Weight 60g / 180ml

9. Kids Mug

Size 70*60*82mm
Weight 67g / 235ml

10. Snackcup

Size 95*65mm
Weight 62g / 240ml

11. Snack bowl

Size 120*50mm
Weight 78g

12. Kids fork, spoon

Size 150mm
Weight 30g

FINGER BRAIN Gears Building set

SPACE-VIEW VEHICLE Building Set

Space-view Vehicle Building Set contains 3 general kits, which can make space train, space tramcar, and space detection vehicle. Each general kit also contains assembly manuals that can transform the kit into 4 kinds of new forms. This allows children to play diverse kinds of games with Space-view Vehicle Building Set.
