

Household gas leak alarming detector

Product description:

Household gas leak alarming detector is used to detect the house gas, natural gas and liquefied petroleum gas (LPG) and carbon monoxide levels dedicated instruments, to prevent carbon monoxide poisoning, combustible gas leakage and the cause of the explosion, protecting personal and family safety.

Working principle:

When the instrument to detect leakage gas concentration reaches a certain standard, begins to sound and light alarm, reminded you having a gas leak, so as to avoid accidents.

Installation:

This instrument installation is convenient, hanging it on the wall by use a small nail, turn on the ac 220 V power supply. According to different installation height to detect gas, carbon monoxide and gas to be installed in the ground 1.8 m to 1.9 m height, liquefied petroleum gas (LPG) to install in from the ground 0.2 m.

Basic parameters:

Size: 120 mm * 85 mm * 50 mm

Weight: about 550 g

Detection gas: carbon monoxide gas, liquefied petroleum gas, natural gas, etc

Response time: ≤ 40 s

Recovery time: ≤ 60 s

Warning: sound and light alarm

Output: on-off signal

Working voltage: AC220V 50 Hz

Working humidity: - 10 °C~50 °C
