11A auto nozzle is designed in accordance with ideal styles required by today's customers. It is small, light and easy to use. At the same time it is well-manufactured, durable and reliable. It is applicable for filling ready-made diesel oil, kerosene and gasoline. Small aluminium gun body: It is light and easy to operate with unique and original appearance. Foam and static electricity are reduced due to pressure casting.

Normally open gear easy to operate all round; it is simple and convenient for customers to configure three different types of flow speeds.

Easy-replaced spout; it only needs to remove the screws connected with the nozzle and replace a new one, so the self-sealing performance of nozzle can renew as soon as possible. The relative supporting components and parts are available from Galaxy.

Gun body casting is optional for ZYQ89-11A: low-pressure casting, pressure casting.
