

## L03 24000mAh

The L03 24000 mAh is stylish for today's power hungry smart phones with high light outdoor lighting function.

- Input over voltage protection to guarantee safety
- Charge devices while power bank is charging
- Prevents and protects against overcharging

### TECHNICAL SPECIFICATION

|                           |                                              |
|---------------------------|----------------------------------------------|
| Battery Type              | : A grade Lithium Polymer                    |
| Power capacity            | : 24000 mAh@3.7V 88.8Wh                      |
| Type-C input              | : 5V/2.4A,9V/2A                              |
| Micro input               | : 5V/2A                                      |
| Charging time             | : About 7 hours                              |
| Type-C output             | : 5V/2.4A,5V/3A,9V/2A,12V/1.5A               |
| USB A1/2 output:          | 5V/3A,9V/2A,12V/1.5A                         |
| IP code                   | : IP53                                       |
| Dimension                 | : 139.2*100*31.5mm                           |
| Weight                    | : 510g                                       |
| LED light                 | : 40pcs each white and yellow 0.5W light LED |
| Power of floodlight board | : 1-5W                                       |
