Instructions:

1. Switch the power to ON mode. If the USB cable is not connected, the charging/pairing indicator will flash slowly. Press and hold FN + 3# key for 3 seconds. The red charging indicator will flash quickly, indicating the keyboard has entered pairing mode. Insert the receiver at this point, and the pairing indicator will stop flashing. This confirms a successful 2.4G connection.

*Note: When connecting in 2.4G mode, ensure the keyboard starts searching before inserting the receiver. The keyboard is pre-paired at the factory by default.

2. Switch the power to ON mode. If the USB cable is not connected, the keyboard will automatically broadcast according to the Bluetooth version of the device. The keyboard can connect to up to two Bluetooth devices. After a successful connection, it will display BT5.0 KB:

3. After turning on the keyboard, connecting the USB cable will switch the keyboard to wired mode and start charging the lithium battery.

4. In Bluetooth/2.4G mode, the keyboard automatically enters power-saving mode after 6 minutes of inactivity (light sleep after 6 minutes, deep sleep after 30 minutes).

Press any key to wake up the keyboard. Battery level can be checked on the computer when connected via Bluetooth.

5. The Type-C connection ensures more reliable connectivity, better stability, and faster charging.

6. This version clarifies the steps, making it easier to follow during testing while maintaining accuracy.

7. Bluetooth Mode (Device Name: "BT5.0 KB"): Compatible with Windows 7 and earlier systems.

Bluetooth Mode (Device Name: "BT5.0 KB"): Compatible with Windows 8, Windows 10, and later systems.

8. Bluetooth Mode: Compatible with MAC computers, Android phones or tablets, and IOS phones or tablets equipped with Bluetooth BLE 4.0, BLE 5.0, or higher hardware

Working Environment:

1. Rated Voltage: DC 3.7V (When the battery voltage drops below 3.3V, the indicator light will flash as a warning. During charging, the charging indicator will remain steadily lit. The device will automatically shut down when the battery voltage drops below 3.0V. After shutdown, buttons will be unresponsive, and the low battery indicator will light up to prompt charging).

2. Charging Voltage/Current: DC 5V / $\leq 200\text{mA}$, with a charging time of approximately 10–12 hours (fast charging is not supported).
